ALLOWANCE

Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings filed on July 23, 2004 was a 'replacement sheet.' Please provide a formal drawings as the proposed replacement sheet was approved Applicant is advised to employ the services of a competent patent draftsperson outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Response to Arguments

2. Applicant's arguments, see Remarks on pages 7-8, filed on March 25, 2005, with respect to Claims 1-9 have been fully considered and are persuasive. The rejections of claims 1-9 have been withdrawn.

Allowable Subject Matter

- 3. Claims 1-9 are allowed.
- 4. The following is an examiner's statement of reasons for allowance:

The instant invention defines a method/system and an apparatus for processing a video signal for choosing an optimal candidate value to be used for matching a block from a first image with an area from a second image as recited in independent claims 1, 4, 7 and 9. The claimed invention distinguishes over the prior art by the manner in which the matching error is being calculated. The claimed combination allows for improving a method of choosing a value to be used for matching a block from an image with another image. This matching method is conventional in the art. However, the prior art of record fails to teach choosing the optimal candidate value from the set based on the calculated matching errors, characterized in that the block is formed by pixels, a selection is made of pixels of the block from the first

Art Unit: 2621

image which are not visibly occluded in the area to be matched from the second image, and the calculation of a matching error excludes from the calculation said pixels of the block that are visible occluded. These elements in combination with all of the other elements of the claims are not taught or fairly suggested in the prior art of record. The dependent claims 2-3, 5-6, and 8 are allowed for the same reasons. Note, newly cited prior art cited (Guichard et al., US 5,909,251) discloses estimating occlusions between at least two image frames of a sequence of frames. However, the prior art yet again fails to teach the selecting of pixels in the first image if it is not occluded by a pixel in the second image and then the matching error excluding errors determined from pixels that are occluded.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shefali D. Patel whose telephone number is 571-272-7396. The examiner can normally be reached on M-F 8:00am - 5:00pm (First Friday Off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Joseph Mancuso can be reached on (571) 272-7695. The fax phone number for the organization where
this application or proceeding is assigned is 571-273-8300.
